Number Inside Manual

**At A Glance:**

This system includes:

- A menu-driven program which can be used by itself, or interfaced with Timeworks' WORD WRITER 3 (word processing), and SWIFTCALC (spreadsheet) software programs, enabling you to produce customized reports incorporating information generated from all three systems.
- Sample data which quickly allows you to become familiar with the command instructions of this program.
- Full user prompting, audio cuing, and password protection. Escape keys allow you to return to the menu at any time.
- A data transfer utility which allows you to transfer data from one file to another.
- A special back-up feature which generates extra backup copies of your recorded information for safe keeping.

**Features:**

- Quick access to important information. Items can be easily retrieved and printed by name, index code, date range, amount range, or any category of information stored in the system.
- Timeworks' exclusive X-SEARCH feature. Allows you to easily CROSS-SEARCH any of the above categories as many times as you need, to locate the specific group of items you require.
- Timeworks' exclusive X-SORT feature. An advanced indexed SORT system which allows you to arrange your stored items in increasing or decreasing order, alphabetically, numerically, or chronologically (by date).
- Timeworks' exclusive X-CHART feature. Enables you to break down statistical information by up to ten indexed categories of your choice, and GRAPHICALLY view your results.
- Calculates numerical data from column to column and field to field. Allows you to perform spreadsheet tasks such as payroll calculations, cost estimates, and more.
- Statistical analysis of numerical data. The DATA MANAGER 2 produces the SUM, AVERAGE, and STANDARD DEVIATION of statistical data entered into the system, and will also produce frequency charts (Bell Graphs) using that data.
- Generates customized data reports. You specify the title, location, and sequence of each column.
- Prints your name and address file onto standard mailing labels, and transfers and prints text information onto labels and tags.

**When Interfaced With Timeworks' SWIFTCALC And WORD WRITER 3:**

- DATA MANAGER 2 generates customized reports and labels – with totals, and lets you automatically create, address, and print out individualized form letters & reports.
- Data from DATA MANAGER 2 can be transferred directly to SWIFTCALC, enabling you to perform sophisticated spreadsheet calculations and comparisons; and transfers information generated by both programs directly into the written text of documents produced by WORD WRITER 3.
