

Fontmaster II Errata

Make the following corrections to your Fontmaster II manual before using the program:

- 1) Pg. 22, middle of page-change " L for Load font " to " F for Load font "
- 2) Pg. 26, change " HOLD: SHIFT CTRL " to "HOLD: SHIFT LOGO "
- 3) Pg. 37, bottom-add the following omitted formatter:
MSn (Multiple Spacing) MS2
This formatter sets the multiplicity fo the line spacing (1 = single-spaced, 2 = double-spaced, etc,)
The default is single-spaced.
- 4) Pg. 39, remove "/u" from table at the bottom of the page. Underlining currently does not work in headers or footers.
- 5) Pg. 69, 8th line from the bottom-CTRL v produces a variable box (□) not a cursor left (←).
