Summarizes revenue and expenses for Profit and Loss statement.

BAR GRAPHS OF ACCOUNT TOTALS

% contribution of each category to the total.

The professional bookkeeping program for the non-accountant. A sophisticated, yet simple, single-entry general ledger program that's complete in one package. The perfect money manager for household accounting or small business applications. Spend a few minutes each week telling your computer what's new. The computer will ask you easy questions about what you bought, how much it cost, what is owed—you just fill in the blanks. Complete reports by all categories—perfect for tax information, cash flow analysis. It all adds up—and shows relative comparisons by printing bar graphs.

Features.

- Single-entry bookkeeping keeps revenue, expense account data current

- Stay up to date, from a monthly income statement to a complete year-to-date summary
- Insta-Ledger asks the questions, you just fill in the blanks
- Calculate totals by category, categories by month
- Figure percentages, see relative comparisons on bar graphs
- A single key generates a Profit and Loss statement for any period
- From a single check or charge to a complete total, Insta-Ledger keeps it all handy
- Makes formal reports, informal cash flow analysis or income tax filing a breeze
- Tax deductible when used for income tax purposes
- On-screen instructions, with any mistakes noted
- Friendly tutorial manual with examples and instructions
