JingleDisk™

**Holiday Musical Story
With Computer Animation**

Card Maker Included

There are holiday cards by the dozen
For everyone from aunt to cousin.
Finding the perfect one was hard,
A special person – a special card!

And to make the job a whole lot tougher,
It had to be a stocking stuffer.

Having searched and searched for something new,
This greeting seemed “just right” for you.

Nothing could be more unique or cuter,
Than this Jingle Disk™ for your computer.
It brings music, graphics, and lots of cheer,
Play it again – year after year!

HAPPY HOLIDAYS!

Your Computer Will Sing and Dance with Joy!

Start a new holiday tradition. Share the music of the season with your friends and your computer.

Even Scrooge will get into the spirit when your computer plays favorite holiday tunes, and enchanting characters dance across the screen.

This new computer story is delightfully animated to thrill young and old, elves and gremlins. And Santa, too.

The story is accompanied by your Yuletide favorites, like Jingle Bells, Santa Claus is Coming to Town, Oh Christmas Tree and more!

Holiday Card Printer
Clever elves can print out their own personalized holiday cards.
