COMMODORE 64™

DISKETTE

Letter Wizard™

Word processing has never been so easy! Whether you type letters, memos, reports, long or short documents, or manuscripts, LETTER WIZARD™ has what you need for creating, editing, and printing all your text files. LETTER WIZARD is a comprehensive three-part program consisting of a powerful editor, formatter, and disk manager.

All the editing and formatting commands are designed to be easy to remember and easy and quick to perform with a few simple keystrokes. You can perform all the standard text move, delete, insert, and search and replace commands in addition to other powerful editing commands. Its powerful formatting features will allow you to print out your document exactly as you want it to appear. A special database/form letter merge feature is also built into the program.

The disk manager is an invaluable feature because it allows you to perform useful DOS functions right from a menu within the word processor. The DOS options include formatting diskettes, renaming files, locking and unlocking files, and deleting files from your disk.

A special prompt line at the bottom of your screen guides you through all the commands as you perform them. Error messages are also displayed so you never lose time wondering "what went wrong?" Because LETTER WIZARD is so easy to use and offers you so many powerful features, you'll save time while increasing your productivity.

FEATURES include:

- DOS functions/disk manager
