## SWIFT SPREADSHEET

### HOW TO START

The Swift Spreadsheet manual is on the program disk. To print it, load the program. Power up your Commodore 64 system, install the program disk in the drive and enter LOAD" ",8 and press RETURN. On seeing READY, enter RUN and press RETURN. You will be prompted to press Function key 5 (f5) to start the program. In answer to the query "Parallel printer: Yes or No" enter n and press RETURN if your printer or parallel printer interface is plugged into the computer's serial port.

### HOW TO USE

Press f5. Move the menu cursor using the f7 and f3 keys to WORKSHEET COMMANDS. Press f5 again. Move to LOAD SHEET. Press f5. Move to Section 1. Press f5. When the sheet has loaded, press f5, move to RANGE COMMANDS, press f5, move to RANGE PRINT, press f5. Be sure your printer is on and set up, then enter A1, H254 and press f5. When printing stops, repeat the RANGE COMMAND and RANGE PRINT for the range J1,Q254. Load Sections 2 and 3 and print ranges A1, H254 and J1, Q254 from each section using the same procedures..
