TERM PAPER WRITER™

How to create the ultimate 20-page term paper in four easy steps:

The Notetaker: An electronic card file that helps you collect information and organize it by source... and by topic. Browse, edit, delete, sort or search through notes, instantly. Print them. Refer to

them while writing or transfer them directly into your paper as you write.

The Outliner: Helps you organize lists of ideas into topical groups or prepare an outline. You can refer to your outline as you prepare text or transfer it directly to your Writer file.

The Writer: A full-featured word processor. Manipulate entire blocks of text with a few simple strokes. Add, delete, insert, edit, boldface, underline and center. There are settings for margins, indentations, line spacing and page breaks. Search and replace words or phrases instantly. It even formats long quotations and counts the number of words.

The Footnoter and Bibliography Compiler: Term Paper Writer will insert footnotes on the appropriate pages and compile your bibliography by drawing all the information

directly from your notes. Correct a source name in your notes and Term Paper Writer will correct it in your bibliography. Add a new quote to your paper and it will remember and reformat your footnotes. All automatically.

Save some time on your next paper with Term Paper Writer. It's the fast and easy way to make the grade.
